Individual and Collaborative Project Management

February 18th 2009

Mike Kremer, PMP

Business Productivity Specialist

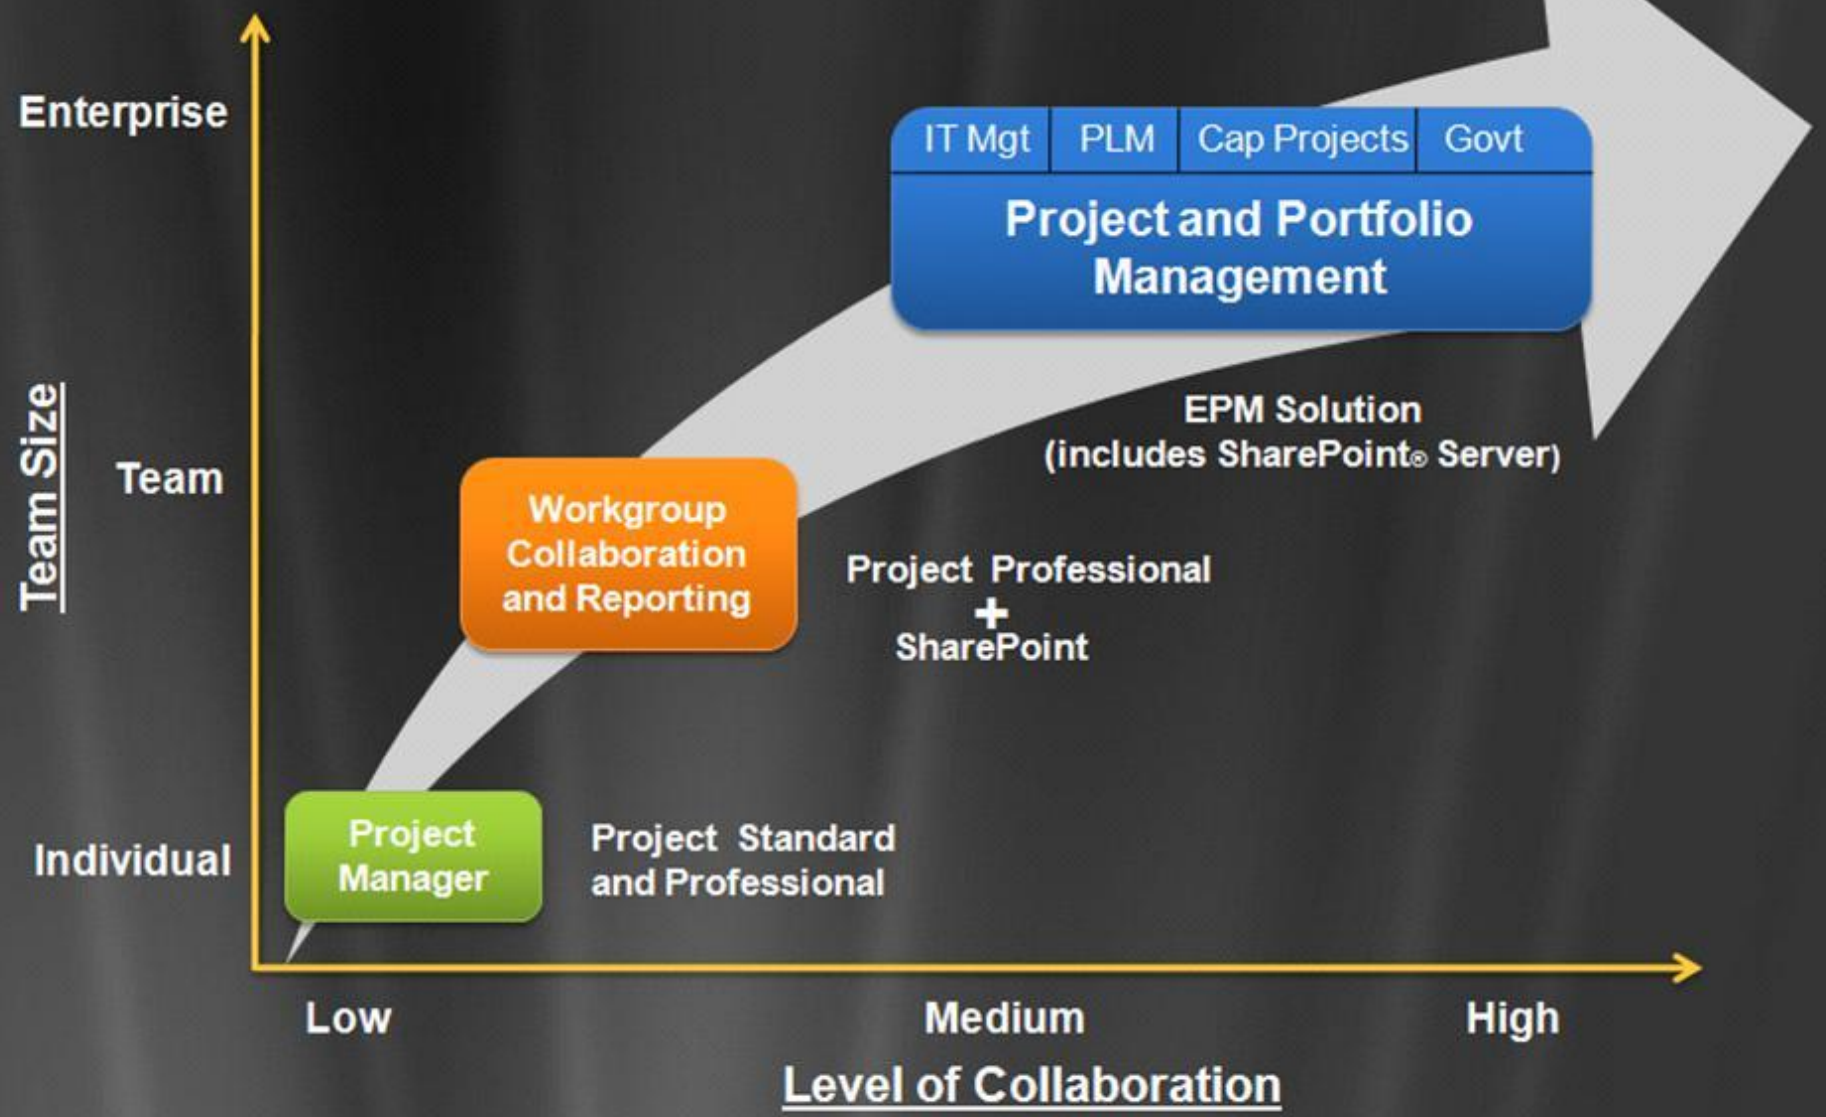

Microsoft

mikekr@microsoft.com

PPM for Individuals, Teams & the Enterprise

No such thing as a “one size fits all” PPM solution

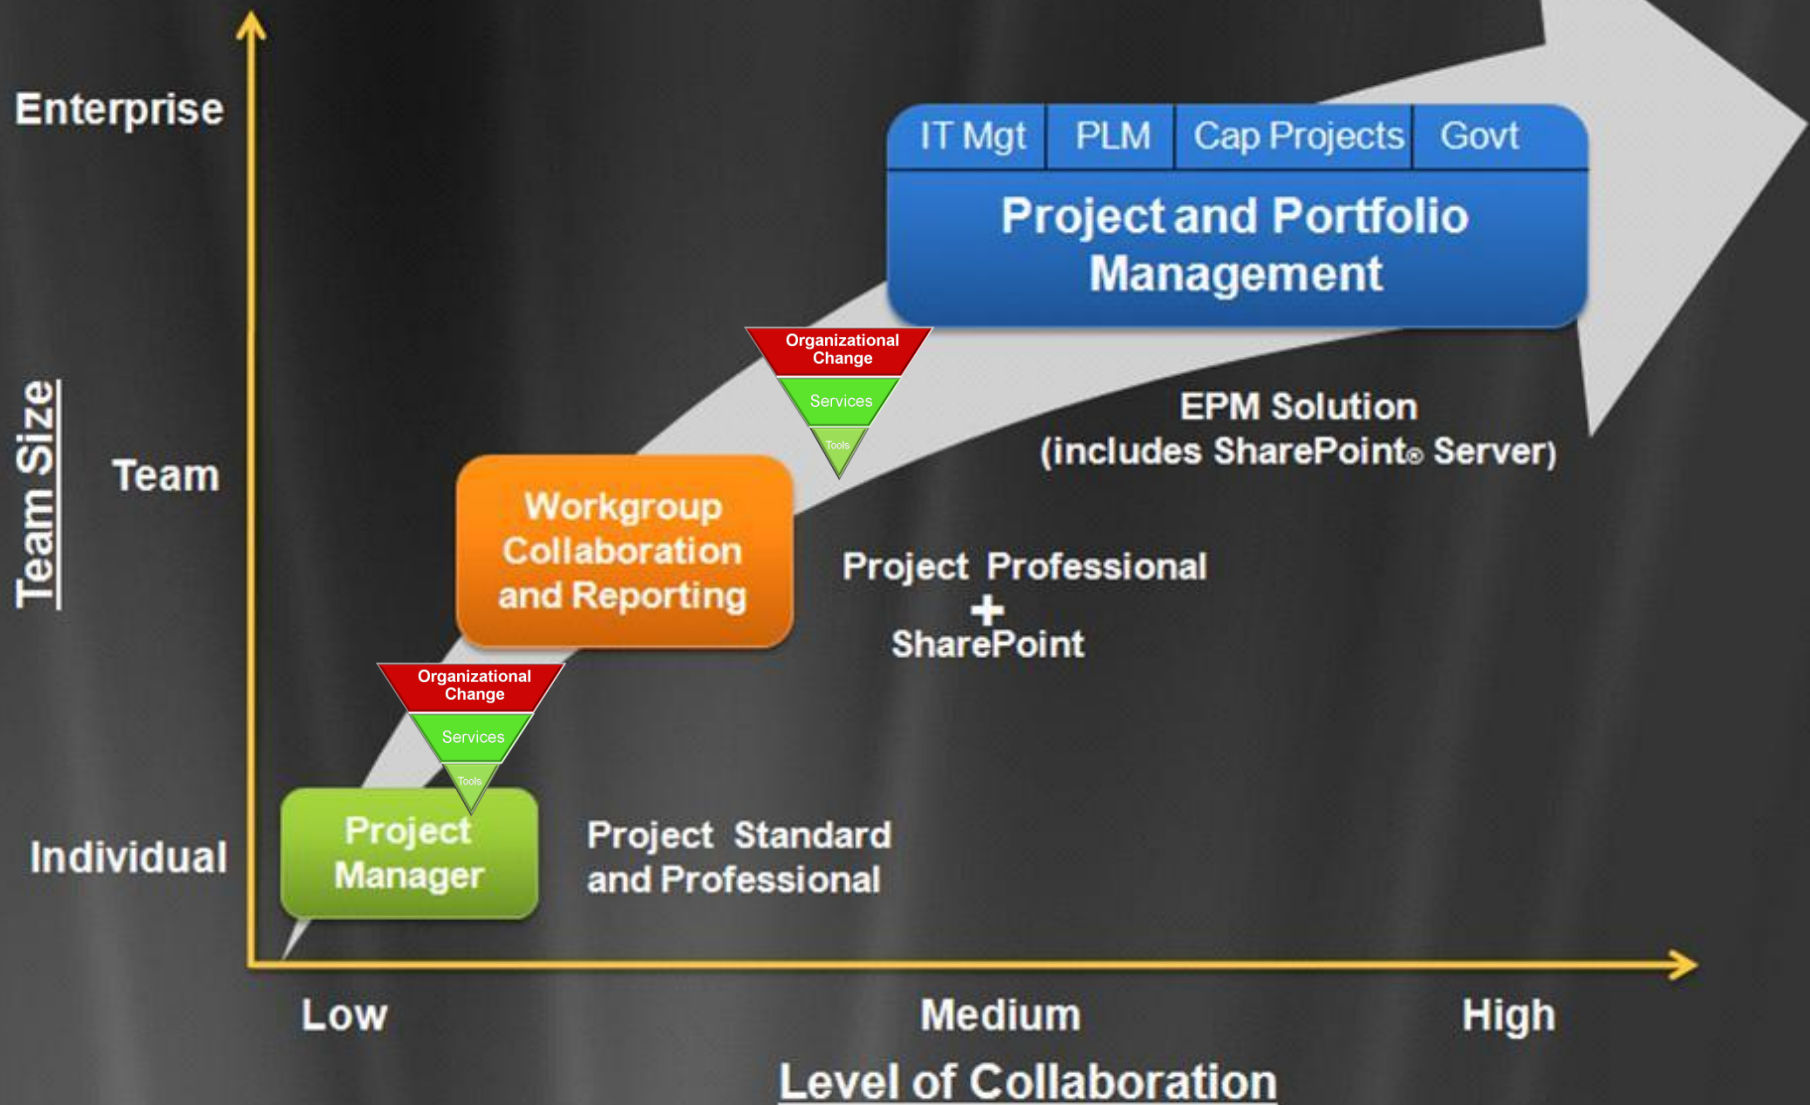

PPM for Individuals, Teams & the Enterprise

No such thing as a “one size fits all” PPM solution

PPM for Individuals, Teams & the Enterprise

No such thing as a “one size fits all” PPM solution

Collaborative PM Goals

- Team/Resource management
- Cost Management
- Schedule Management
- Quality Management

1987

- Scheduling
- Simple reporting
- Task management
- E-mail and print
- Resource tracking

2009

Financial Management

Resource Management

Portfolio Management

Reporting

Program Management

Project Collaboration

Enterprise Project Management – Prerequisites

- Organizational Maturity
 - Current Resource Management?
 - Current Communication Management?
- Consistent Executive Sponsorship
 - Budget
 - Motivation

C-PM Requires Process Change

Traditional Project Management Process	Collaborative enterprise Project Management Process
Project proposals are created ad-hoc	Consistent process in place for proposing projects
Project plans are created using many tools (Excel, Word, Project), or not	Project plans are created using a common process, one tool
Project plans are maintained on PC hard drives, network drives	Project Plans are all stored in one place
Project manager uses manual process to notify team members of their tasks	Team members can see all assigned tasks across all projects via the web
Project manager collects status manually and updates schedule	Project team members update their tasks via the web
Results	
No way to see program schedules, KPIs, common milestones	Dashboards, program roll-ups, simple ad-hoc reporting across projects
No way to see resource allocation/availability	Single view of all project resource utilization, forecasting

Early Steps To Collaborative PM

- Process and Tools Training
 - Create Subject Matter Experts
 - Project Certifications

- SharePoint
 - Team Tasks
 - Deliverable Documents
 - Risks, Issues
 - Store Project Plans
 - Share Reports

Case Study – Manufacturing Company

Fabrikam

Fabrikam: A Common Set of Problems

- Homemade Tool in Place
- Multiple International Sites, Methodology Variations
- Needs:
 - Resource and Portfolio Planning
 - Task Tracking
 - Reporting
- Business Must Approve Case for Funding EPM

- Detailed RFP Created
- Presentation to Decision Makers

- Outcome – Microsoft Chosen, Project Not Funded

Team Project Site on SharePoint

The screenshot shows a web browser window displaying a SharePoint site for the Northwest District Project Team. The browser's address bar shows the URL `http://my/personal/mikekr/NWDPT/default.aspx`. The page header includes the user name "Mike Kremer" and a welcome message "Welcome Mike Kremer". The site title is "Northwest District Project Team".

The left sidebar contains navigation options: "View All Site Content", "Documents" (with sub-items "Deliverable Documents" and "Change Requests"), "Lists" (with sub-items "Calendar", "Tasks", and "Project Issues"), "Discussions" (with sub-item "Team Discussion"), "Sites", and "People and Groups" (with sub-item "Recycle Bin").

The main content area is divided into three columns:

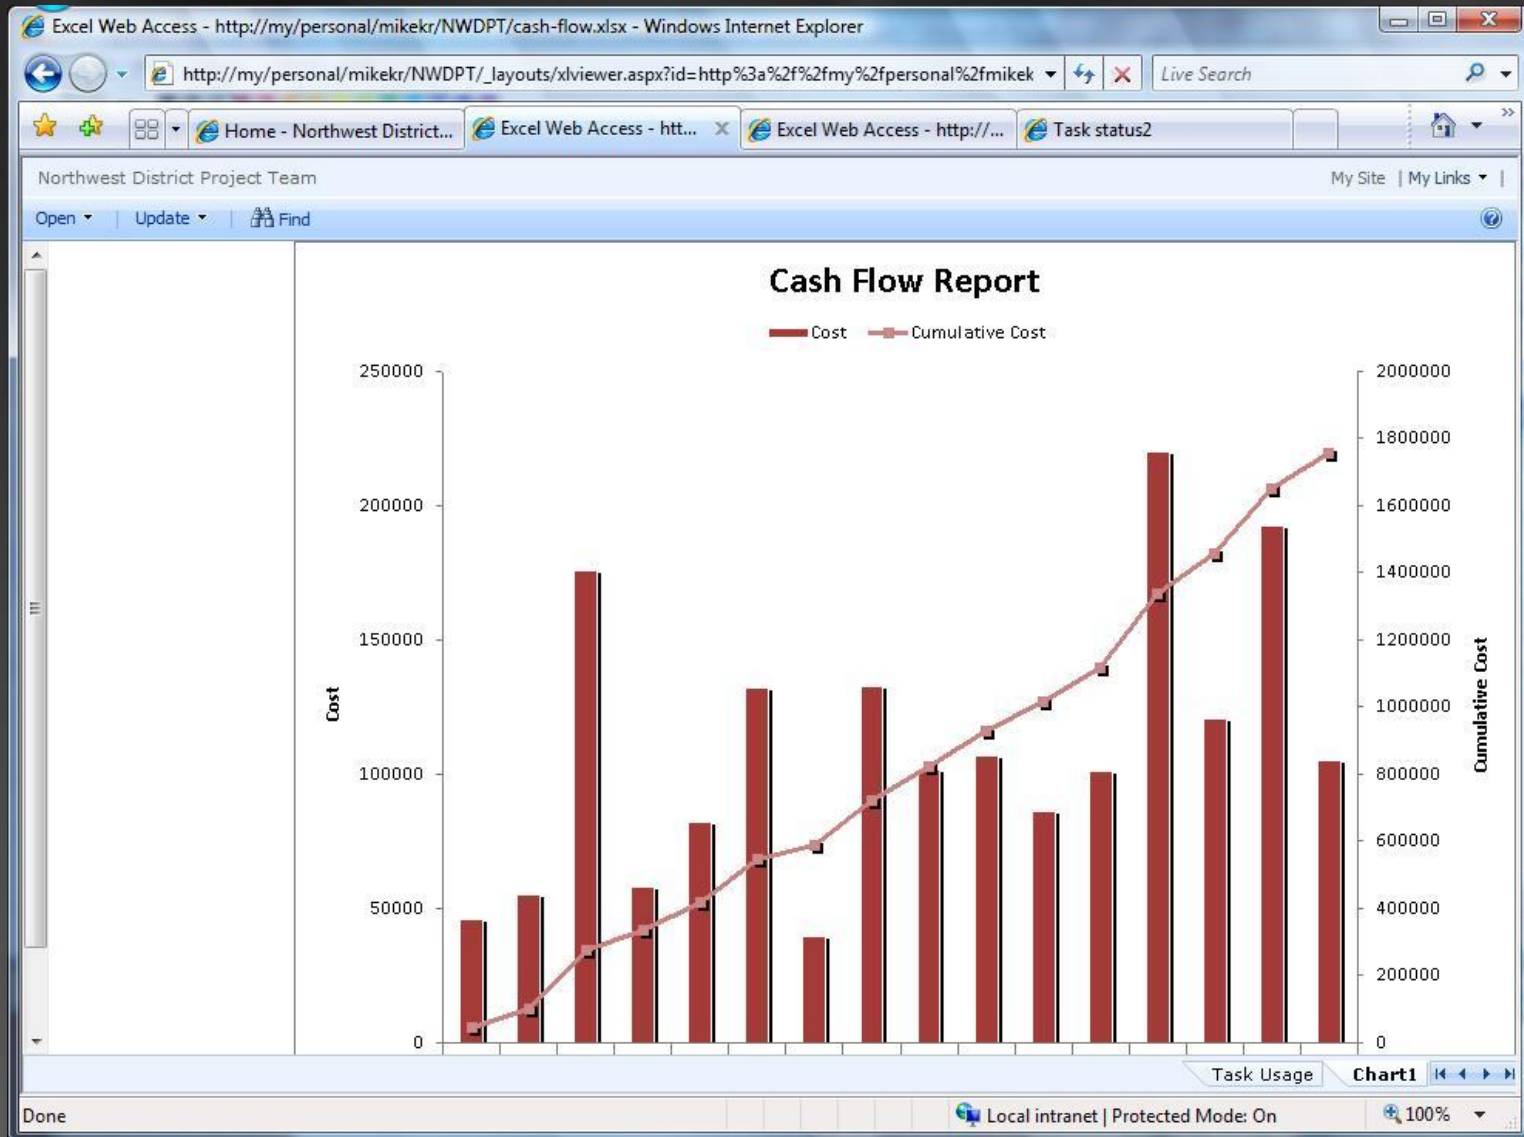

- Announcements:** A section with a dropdown arrow. It contains the text: "There are currently no active announcements. To add a new announcement, click 'Add new announcement' below." Below this text is a link: "Add new announcement".
- Calendar:** A section with a dropdown arrow. It displays a calendar entry: "2/18/2009 8:00 AM How Microsoft Project can save our Customers Money". Below this entry is a link: "Add new event".
- Project Reports [2]:** A section with a dropdown arrow. It lists two reports: "Task status report", "Baseline Cost", and "Cash Flow". Below this list is a link: "Add new link".

The right column contains two sections:

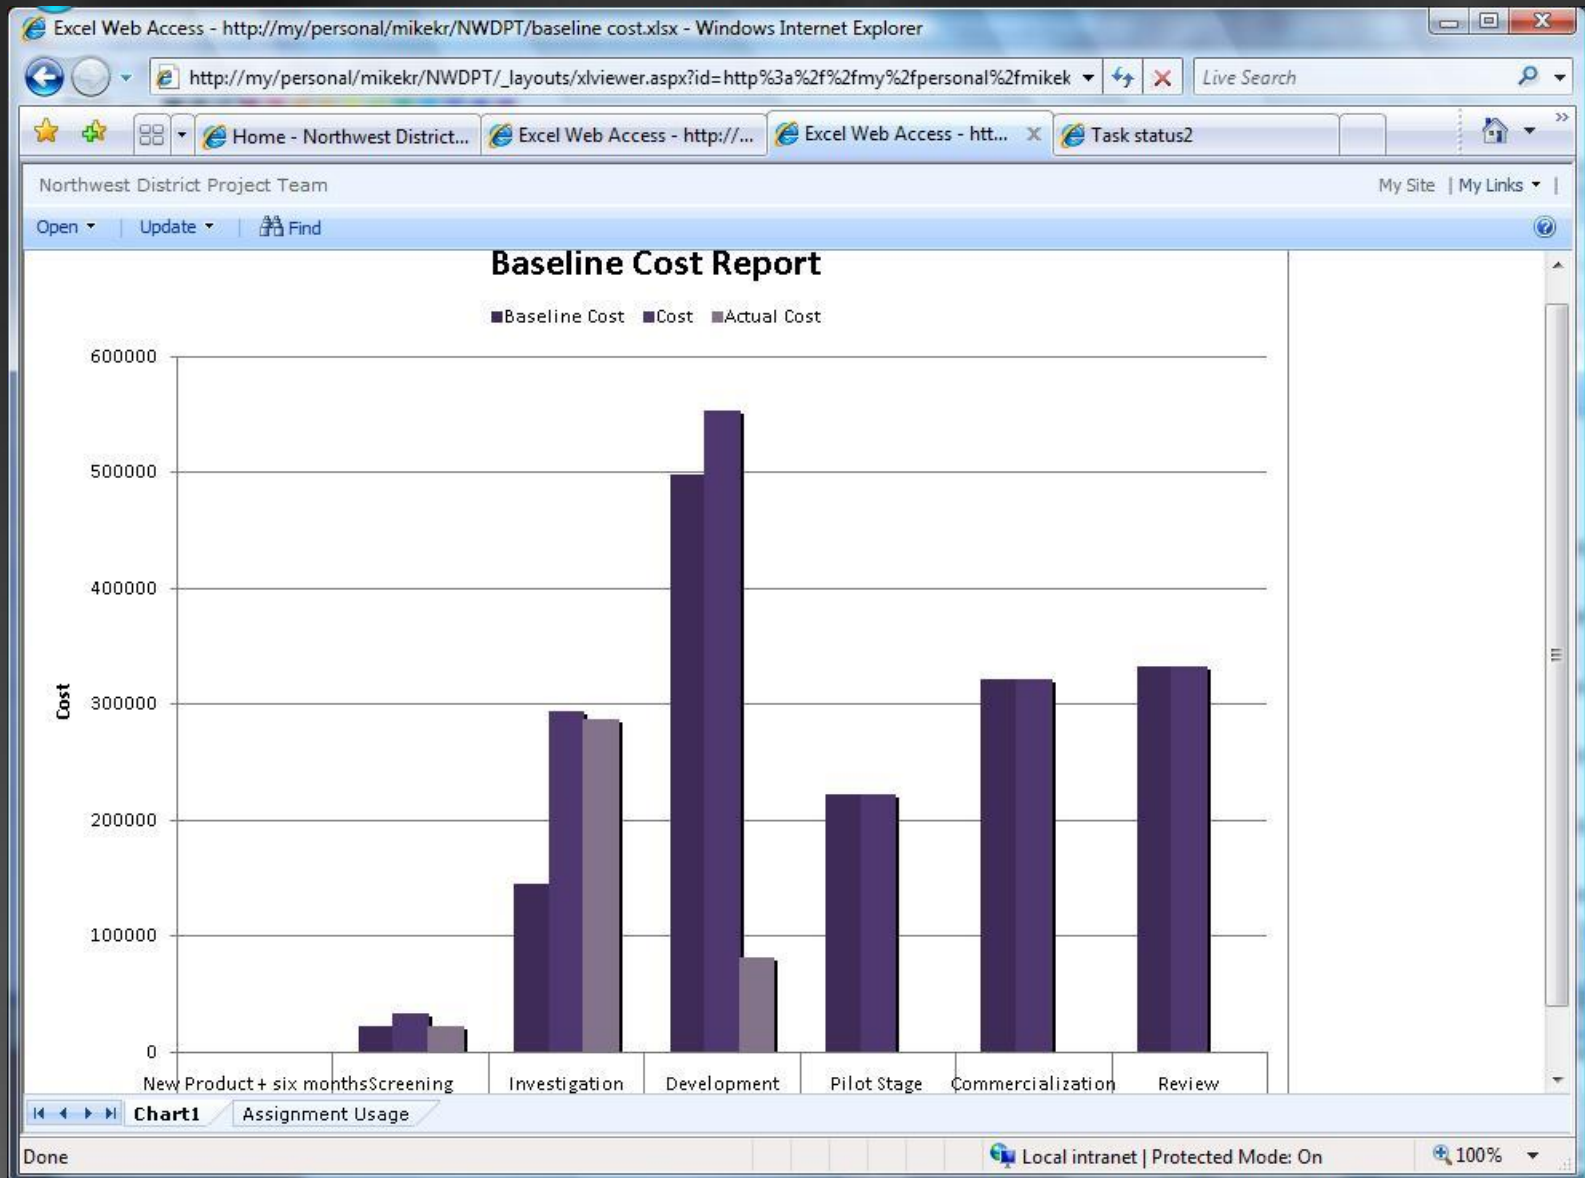

- Tasks:** A section with a dropdown arrow. It has a table with columns "Title" and "Assigned To". One task is listed: "Prepare Presentation for San Francisco event" assigned to "Mike Kremer". Below the table is a link: "Add new item".
- Colleague Tracker:** A section with a dropdown arrow. It has a "General" section listing colleagues with their status (e.g., "Out Of Office"). The list includes: Ben Hickman, Chris Barnard, Derek Loar, Derek Nishino, Doc Dochtermann, Erin Brimmer, John Cho, Michael Panciroli, Rob Herman, Roger Wilding, and Tom Butowicz. Below the list are two checkboxes: "Show only colleagues with changes" and "Change what gets tracked".

The bottom of the browser window shows the status bar with "Local intranet | Protected Mode: On" and a zoom level of "100%".

Effective Project Management for Business Results

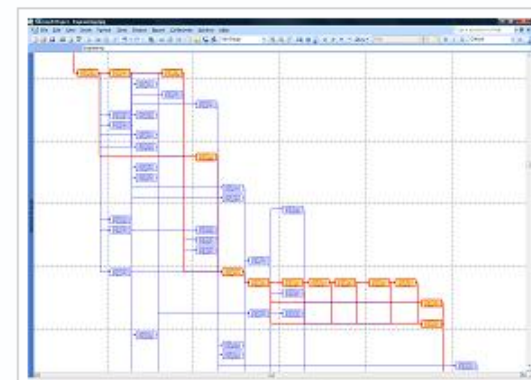

Many companies have derived significant benefits by improving business processes with project management processes supported by Microsoft technology. One local manufacturer needed to decrease the time it takes to deliver their high-quality products to market. To do that, they developed a process that used Microsoft technologies to efficiently manage product development processes, projects, and information. A solution based on Microsoft's Enterprise Project Management Solution and Microsoft Visio provided them with the following benefits:

- Optimized the conversion of timelines to detailed project plans from days to minutes
- Delivered products to market faster and cheaper by increasing efficiency of project execution up to 20%
- Delivered great products every time by improving process consistency
- Increased capacity with a cost-effective and scalable organization
- Enabled REI to allocate more time for dedicated research

A recent study by KPMG consulting found that in 300 large companies across the US, 65% of projects are failing; they are behind schedule, over budget or not meeting requirements. Surprisingly, most of the interviewed executives considered this "normal" - neither surprising or particularly troubling. In our view, this is simply not acceptable, and our Business Productivity Specialists have the experience and expertise to help our customers deliver projects on time, on budget and that meet or exceed expectations.

Project Management methodologies help companies realize significant business value by:

- Improving the success of projects across the enterprise

The Network Diagram: an essential tool in understanding the flow of project activities
